TRADE PRICES OF

NEW AND DESIRABLE SEEDS For 1895

LIBRARY
JUL 24 1923

We take great pleasure in offering to the Trade the following list of valuable novelties and specialties, which have been thoroughly tested and carefully grown, and will be most generally catalogued by all the leading houses in the Trade. On some varieties our stock is limited; orders should at once be sent in and booked. Shipments made at any time desired. Electrotypes furnished free.

Terms:
June 1, 1895.

H. G. FAUST & Co.
PHILADELPHIA, PA.

RICINUS ZANZIBARIENSIS.

This is a most striking novelty from East Africa, an entirely new and distinct class, and may, in its general appearance, be compared to a luxuriantly growing giant Aralia Sieboldi. The plants attain great dimensions, presenting a splendid aspect with their gigantic leaves, which range from brilliant coppery bronze to light and dark green; the ribs, also, are of bright colors and contrast nicely with the leaves. They make handsome specimen plants, and will become a general favorite. We have had the seeds engraved natural size, as in the illustration, and in themselves they are a great curiosity, being highly polished and of the most beautiful colors. Electros free.

Trade price, per lb., $5.00. ¼ lb., $1.50.

ROYAL RED TOMATO.

This fine variety is worthy of a prominent position in every catalogue. It is a first-class main crop variety for the shipper, marketer and private gardener, and no essential point is lacking. Wherever **Royal Red** has been exhibited the past three seasons it has easily carried off the **Red Ribbon**, and everybody was attracted by its **vivid red color** and handsome general appearance, even when shown with collections of forty and fifty other kinds.

Trade price, per lb., $1.15.

This is the finest early round red Radish ever introduced, and has given unbounded satisfaction. It is most perfect in shape, bright scarlet color, very crisp and tender. The leaves are short and make a very small top, and in three weeks after sowing, the Radishes are ready for the table. Its beautiful form, splendid eating qualities and extra earliness have placed it at the head of Radishes, none finer ever having been produced.

Three styles electros to select from, free with orders for ten pounds or more.

Trade price, per lb., 60 cts.: per 100 lbs., $50.00.

CLIMBING CUCUMBER.

This new Cucumber has created unparalleled sensation in the trade on the continent, and has proved to be a valuable novelty. It climbs vigorously to a height of 6 or 7 feet on poles, and is prized for its prolific and hardy qualities, a single vine bearing 50 to 75 well-formed fruits, about 10 inches in length, of a dark green color and of delicious flavor. The fruits are netted when ripe. The fruit is very fleshy, solid and sweet, with exceptionally few seeds. As a variety for slicing, they will prove very useful, while for exhibition no other cucumber will attract so much attention. Their shape is very uniform, straight and perfectly smooth. Although very hardy, it forces well and comes into bearing very early.

Trade price, per pound, $2.00.

PHILADELPHIA GROWN BEET SEED.

(Market Gardeners' Selected Stock).

Bastian's Blood Turnip, ...	per lb.,	20	cts.
" Half-long Blood, ...	" "	20	"
Lentz's Extra Early Blood Turnip, . . .	" "	25	"

DISH-CLOTH GOURD.

Electros free with orders for one pound or more.

Trade price, per one-quarter pound, $.80.
Per pound, $2.50.

This variety possesses the peculiar merit of flowering and bearing fruit continuously the entire season until killed by frost, and besides being a most prolific variety. It will yield a good crop where others fail. Fruit firm and crisp, of a dark green color. It has been raised for some years in Burlington County, New Jersey, and the pickles, when marketed, bring the highest price. Electros free with orders for ten pounds or over.

Trade price, per pound, 40 cts.
Per 100 pounds, $35.00.

Victoria Spinach (New).

This new variety is distinguished for its exceedingly dark black-green color, and also for its very long-standing qualities, being from two to three weeks later than the ordinary "Long-Standing." The leaves are thick and spread out flat upon the ground. It is excellent for spring sowing, but not sufficiently hardy to stand the winter in this locality.

Per pound, 17 cents. 100 pounds, $13.00.

IPOMŒA HEAVENLY BLUE.

This wonderful new annual climber originated from seeds of Mina Lobata which grew near Ipomœa Leari. All summer humming birds flitted back and forth between the two. That season, the fall of 1888, the latter gave no seeds, the former but few which were planted in the Spring. Among the seedings appeared these, with large cordage, light green leaves, smooth and firm in texture, with reddish-brown vine, and stems like Mina Lobata, but with flowers shaped like I. Leari. Color, an out-and-out sky blue, the lovely blue so rarely seen in flowers, resembling Salvia Patens but lighter; centre of flower shaded lighter, delicately rayed with a glow of yellow deep in the throat. In the morning about nine o'clock no lovelier sight can be imagined than this climber, which is completely covered with bloom so much so as to almost cover the foilage Undoubtedly, the humming birds were matchmakers and this beautiful hybrid the result. It is a rampant grower, and blooms till very late fall Will do well in the conservatory as well as outside. Every one who sees it, with its cloud of airy blossoms, measuring 4 to 4½ inches across exclaims: **"That is the loveliest thing I ever saw; I must have it."**

Electros free with order for three ounces or more.

Trade price, oz., $1.00.

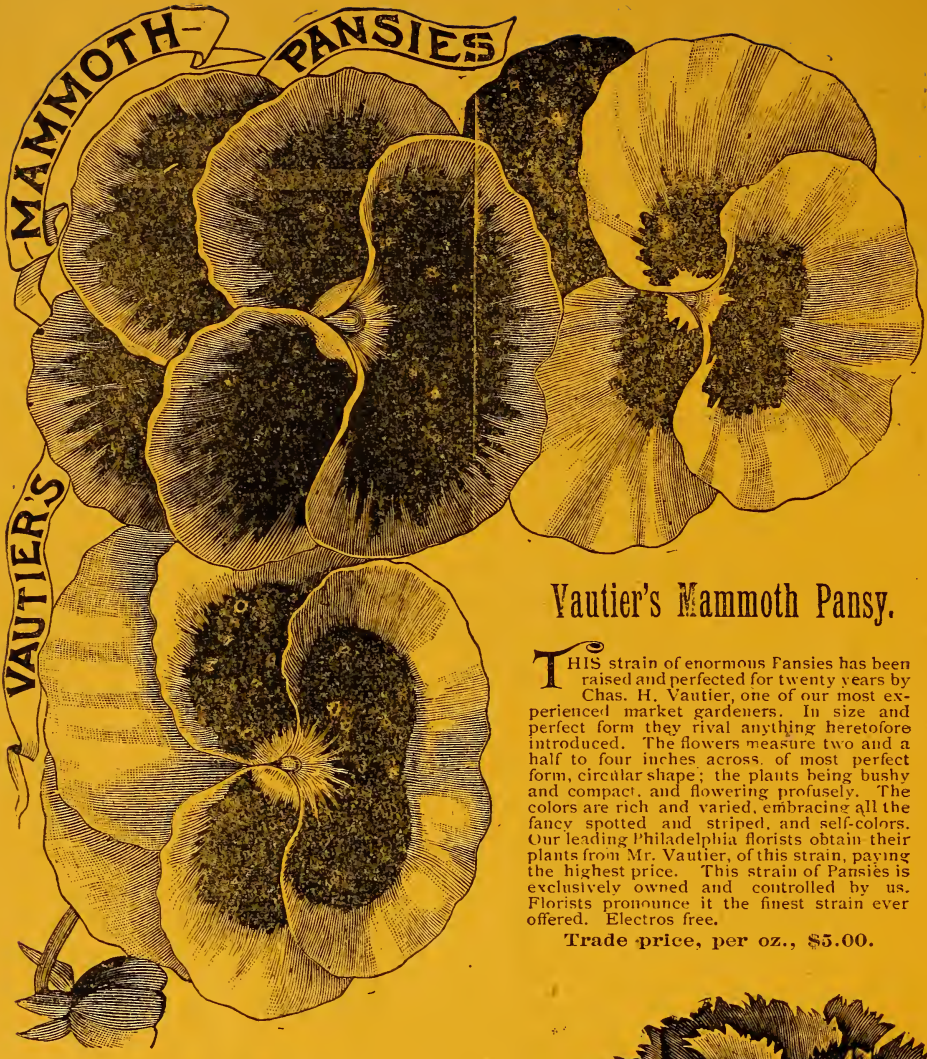
DATURA CORNUCOPIA

The plant is of a very robust habit. The stem is thick, dark brown-purple, shining as if varnished. The branches are very numerous, spreading symmetrically 3 or 4 feet in every direction. The leaves are large, of a dark green color.

The flowers are trumpet-shaped, measuring 8 to 10 inches in length and 5 to 7 inches across the mouth, and form three distinct flowers, growing each within the other, the throat and mouth of corolla a most delicate French white, beautifully contrasted and marbled with royal purple on the outside They are produced in great abundance, a single plant given easily from 200 to 300 fragrant blooms during the season, followed by a large thorny seed-vessel, which adds to the beauty of the plant.

Electros, $4 00.

Trade price per lb., $12.00.



Vautier's Mammoth Pansy.

THIS strain of enormous Pansies has been raised and perfected for twenty years by Chas. H. Vautier, one of our most experienced market gardeners. In size and perfect form they rival anything heretofore introduced. The flowers measure two and a half to four inches across, of most perfect form, circular shape; the plants being bushy and compact, and flowering profusely. The colors are rich and varied, embracing all the fancy spotted and striped, and self-colors. Our leading Philadelphia florists obtain their plants from Mr. Vautier, of this strain, paying the highest price. This strain of Pansies is exclusively owned and controlled by us. Florists pronounce it the finest strain ever offered. Electros free.

Trade price, per oz., $5.00.

We are probably the largest growers of Sunflowers in the United States, our Kansas farm being situated in the Sunflower country, and we wish especially to call the attention of the Trade to our facilities for filling large orders for the seed. We offer choice, heavy seed only. Terms, 30 days. Electros free with orders for three bushels.

Trade price, per bushel, $1.25.

Still one of the most popular selling flower seeds. Electros free.

Trade price, per pound, $10.00.

HICKORY KING CORN.

Introduced by us in 1886. We have the genuine seed in all its purity.

Two styles of electros to select from, furnished free with orders for six bushels or more.

Trade price, per bushel, $1.20.

Japanese Buckwheat.

As in former seasons, we had our stock of Japanese Buckwheat grown in the mountains of Pennsylvania, and it is well known that there is no better region in the world for the successful growing of Buckwheat. Two styles of electros to select from, furnished free with orders for 6 bushels or more.

We can furnish any quantity up to 2500 bushels. *Terms, thirty days.*

Trade price, per bushel, 80 cts.

Crimson Clover has been so extremely advertised, and the demand has increased to such an extent, that every up-to-date seedsman should illustrate and list it. It is sown largely in the Spring time, although best results are from Fall planting. Electros free with orders for 5 bushels or over. Electro, $1.00 Terms, net cash.

Trade price, per bushel, $3.00.

Crinum Kirky. This magnificient bulb, which often attains enormous proportions, produces flowers of the greatest beauty. Usually two flower stalks of dark purplish color are sent up at the same time, each bearing a large umbel composed of a dozen or more **enormous Lily-like flowers** of the greatest beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe through the centre. A plant which always creates a sensation when it blooms, which it does with the greatest freedom. Electros free with with orders for 50 or over.

Trade price, Bulbs, $20.00 per 100.

GENUINE STRAIN SUREHEAD CABBAGE.

We take pleasure in offering to the Trade our Genuine Strain Surehead Cabbage grown by us at Bristol, Pa., with the greatest care from selected heads. This Cabbage gives better satisfaction for general use than any other variety. It is all head, and always sure to head. Two styles of electros free, with orders for 5 pounds or over.

Trade price, per pound, $.90. Per 100 pounds, $80.00.

Faust's Early Crimson Beet.

This distinct Beet is well represented in the illustration. The roots are of handsome turnip shape, the skin is deep blood red in color; the flesh being also very dark, of the finest quality, tender and sweet at all times. It is the earliest Beet in cultivation, and is ready to market along with the Egyptian, but does not become stringy or tough with age. They are of good size and very uniform, the tops are short and green of a rich color. As an early Beet it has no equal, and for late sowing, its quick, rapid growth makes it also valuable. Market gardeners pronounce it the finest Beet ever introduced. Two styles of electros free with orders for 10 lbs. or over.

Trade price, per lb., 30 cts.
100 lbs., $28.00.

PERKINS' MAMMOUTH LONG PODDED OKRA.

The pods are an immense green color, about eight inches long, and do not get hard, as with other sorts. Its productiveness is simply wonderful, the pods shooting out from the bottom of the stalk within three inches from the ground, and the whole plant is covered with them to the height of a man's head. Mr. Perkins always obtains $3.00 or $4.00 per basket for his Okras in Philadelphia markets; also, much sought after by canners, being the best of all green sorts for Winter use. Electros free with orders for 10 pounds.

Trade price, per pound, 25 cents.

SACALINE

The New Forage Plant

THE CLAIMS made for this wonderful **new forage plant** may seem extravagant, and yet they are fully borne out by testimonials of the strongest character and endorsed by horticulturists of the greatest prominence whose word can not be doubted, seconded, as they are, by the agricultural press of the entire world.

SACALINE is not a **new plant,** having been brought from Russia to Paris twenty years ago, by Mr. Edouard Andre, and sold ever since **as an ornamental plant,** by the principal nurserymen. Its specialties **as a forage plant,** however, were not discovered until 1893, when the severe drought experienced in France, having destroyed **every other** forage plant but this, it was found that horses, cattle and sheep would eat it with avidity. This, of course, created an immense demand for plants and seeds, the latter selling even at the rate of $35.00 per pound.

If it is considered so valuable in France, how much more will it be so here where the cattle interest is so enormous—especially in the West and South, where scarcely any other forage plant than this will grow.

It has been recommended by the greatest horticulturists in this country, notably by Professor J. L. Budd, of the Iowa Agricultural College, who has grown it for 12 years and claims that it is not only perfectly hardy, but an exceedingly strong grower plant, having made a **growth of fourteen feet by June.** Enough to prove that it could be cut every month during the growing season.

We can supply

ELEAGNUS LONGIPES

A valuable new fruit, as well as a magnificient Ornamental Shrub from Japan

Perfectly hardy, **free from disease** and **Insect Vermin** of all kinds. Very attractive, in bloom by May, after which, until late in fall, it is clothed in luxuriant green foliage; silvery underside and producing in profusion handsome bright red berries, which make delicious sauce.

This fruit has been grown and highly prized in an amateur way for a number of years; but not until the past saason has its great value as a garden or market fruit been recognized. We anticipate for this rare and valuable addition to our list of choice fruits an immense demand as soon as its great merits become known to the public.

Electros free with orders for five ounces or more.

Trade price, per ounce, $1.00.

COBOLA SCANDENS

We offer a very choice strain.

Trade price, per pound, $2.75.

CROZY CANNA

Seed saved from over fifty of the finest varieties.

Trade price, per pound, $3.00.

Ipomoea Purpurea fl. Pleno,

Double fld. Morning Glory.

THE number of hardy annual climbers is not very great, and we do not doubt a moment but that this **first double fld.** Convolus Major or Morning Glory ever introduced will be greeted as a welcome addition to this class of plants. It is of rapid growth and produces its double flowers very freely, resembling, in form, those of the Calystegia pubescens fl. pl. They are white with a slight spot of red or of blue at the base of the larger petals. About 80 per ct. of the seedlings will reproduce themselves true from seed, the remainder will flower semi-double or single. Electros free with orders for 2 ounce or more.

Trade price, per ounce, $2.00.

The New Tree Poppy

(DENDROMECON RIGIDUM).

This is a novelty for which there will undoubtedly be a great demand. The Yellow Dogwood might be a better name for it. It is a California plant, a native of the dry, rocky coast ranges from San Diego to Clear Lake, and found most abundantly south of Point Conception, and on Santa Rosa Island. The flowers are yellow, with all the characters and intensity of a **True Poppy.** They are terminal on numerous twiggy branches produced by the straw-colored older wood. It grows about three feet in height with leaves of a bluish color, contrasting elegantly with the color of the flowers. The flower spreads widely in the early part of the day, but assumes a more cup like form after noon. The two forms are given in our engraving. The plant is perfectly hardy in England. It is somewhat valuable in the character of its leaves, and undoubtedly a handsome plant when well grown, a valuable feature being the length of time during which the flowers are produced. Electros, $2.00.

Trade price, per ounce, $2.00.

GREAT JAPANESE WINEBERRY.

The Japanese Wineberry is now acknowledged to be the most valuable fruit novelty ever introduced. It is the most desirable, hardy and profitable small fruit for any climate ever introduced. Full description sent on request.

Trade Price, Seed, per ounce, $2.00. **Trade Price, Plants, $4.00 per 100.**

New Hibiscus.

"Crimson Eye."

This elegant strain of Hibiscus originated with us, and after many years of careful selection we have it entirely distinct, always coming true from seed. It is a robust grower, averaging 4 feet in height, with dark red stems and foliage. The flowers are immense in size, often measuring **20 inches in circumference.** The color is of the purest white with a large spot of deep velvety crimson in the centre of each flower. It is a striking combination of color, and one that must be seen to be fully appreciated. A well developed plant will produce several hundred of these flowers in a season. It will succeed anywhere, and is perfectly hardy, blooming the first year from seed sown in the open ground. Electros free with orders for 1 pound or more.

Trade price, per lb., $10.00.

Centrosema ★ Grandiflora

This is a perfectly hardy perennial vine of rare and exquisite beauty, which blooms early in June from seed sown in April, and bears, in the greatest profusion, inverted pea-shaped flowers, from 1½ to 2½ inches in diameter, and ranging in color from a rosy violet to a reddish purple, with a broad feather-white marking through the centre. The large buds and the back of the flowers are pure white, making it appear as if one plant bore many different colored flowers at one time. Occasionally plants bear pure white flowers, while others are margined with a broad white feathering. The flowers are produced in the greatest abundance, sometimes 6 to 8 in a single cluster. The stem and foliage are very graceful, and of a delightful odor. Blooming stems placed in water remain fresh for many days. It is well adapted for every garden purpose, and especially as a climber, running 6 to 8 feet in a season. Even in the poorest soil it will bloom freely until cut down by frost. Electros, $2.50.

Trade price, per pound, $8.00.

Freesia Seed.

Freesias can be readily grown from seed and will bloom in about four months. Electros free.

Trade price, per pound, $4.50.

Mina Lobata.

We have a very choice strain, and offer seed at a special low figure.

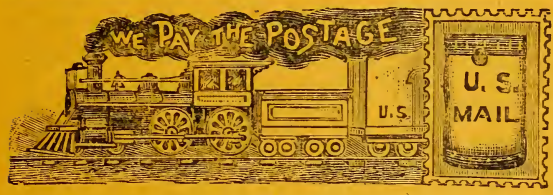
Trade price, per ounce, 75 cts.

Electros free with orders for one hundred pkts. or over.

Trade price, per 100 pkts., $2.00.

Columbian Squash.

In this remarkable novelty we find "the useful" as well as "the ornamental" combined, the two rare qualities seldom found in the garden vegetable. The vine, which runs but little, bears a number of large finely spotted leaves and very large yellow flowers. The fruits are round, flattened, pure white and handsomely striped with green. The flesh and seeds are very white. The fruit is produced in large numbers, and one ripened and dried will keep for a long time. The seed is also appreciated, in certain countries, as a vegetable. *Even the flowers* are dipped in the yellow of egg and fried, making an extremely delicate side-dish. Exaggerated as this description may seem, yet it is vouched for by the introducers of this great and desirable novelty.



If you do a mail business, either or both of above will be valuable in your catalogue; illustrate your business. Electros $1.00 each, by mail postpaid.

Winnigstadt Cabbage

We have an extra fine strain grown for us on contract abroad and are enabled to offer at following low figure. Electros free.

Trade price, per pound, 60 cts.
Per 100 pounds, $50.00.

Extra Early White Pearl Onion Seed

The demand for Pearl Onion sets and seeds in the South is increasing yearly, and it is also being used in other sections of our country with good results.

Trade price, per pound, $1.40.

MELROSE MELON.

The most handsome and decidedly the BEST of all new Cantaloupes.

MELROSE MELON, introduced in 1893, has fully sustained all claims that it is the best of all musk-melons. It is a very hardy, strong and vigorous grower, the vines remaining green longer than any other variety. The melons are produced abundantly and very close to the hill—a feature of the greatest value. The color is rich, dark green; the shape is oval, as shown in the illustration. The melons average in weight about four pounds, and are finely and densely netted, showing but slight tendency to rib; the form is remarkably perfect and true; all in all, the handsomest and most showy of all melons. The flesh is very thick and solid; *clear, light green in color, shading to a rich salmon at the seed cavity. In flavor,* THE MELROSE *cannot be equalled by any other variety, and carries its superior quality and sweetness to the extreme edge of the skin.* It is about one week later in ripening than the small early Jenny Lind. This superb new variety will produce more good, salable melons, "hold up" longer, stand more handling and rough usage than any other known, thus making it the best and most desirable either for home or market purposes.

Trade price, per pound, $1.25.

ALL HEAD EARLY CABBAGE

This new variety, recently introduced, has given excellent satisfaction. It is one of the earliest large Cabbages, being one-third larger than Early Summer. The deep, flat heads, are remarkably tender, solid and uniform, in color as well in size and shape. It is all that can be desired for earliness. It is also valuable for a late or Winter Cabbage. Electros free.

Trade price, per pound, $1.00. Per 100 pounds, 90 cents.

TETRANEMA MEXICANA.

(Mexican Foxglove).

This charming little Mexican plant is new in this country. We have grown it from seed and it is never without its numerous bunches of pretty purplish-blue flowers from January until December. Its very neat foliage contrasts elegantly with the flowers. A first-class window gem. Electros, $1.25.

Trade price, $2.00 per 1000 seeds.

PHYGELIUS CAPENSIS.

(Cape Fuchsia).

Seldom have we seen a plant so charming and free blooming. During our dry Summer it was never out of flower, while Geraniums alongside of it were drying up. Plants only 15 inches high bear from 10 to 20 bold stalks, completely crowded with long, showy scarlet flowers; persistently produce from May until late in the Autumn. An elegant bedding plant as well as *pot plant*, growing in any kind of soil, and will probably prove hardy. Electro, $1.50.

Trade price, per one-half ounce, $5.00.

Nemesia Strumosa Suttoni.

This charming plant is undoubtedly one of the most beautiful annuals that has been introduced into cultivation for some years past. It is a native of Africa and was first introduced last year by Messrs. Sutton & Sons, of England. This Nemesia is remarkable for its free flowering character, long duration in bloom and astonishing diversity in the color of its flowers. If raised under glass in March and transferred to the open ground in May, the plants begin to show their beauty in June and continue in flower till the end of September. Several stems are thrown up by each plant to the height of 12 or 15 inches and the range of colors includes white, pale yellow, rich deep orange, and all shades between pink and deep crimson. Electros, $2.00.

Trade price per one-quarter ounce, $2.00.

GERARDIA TENUIFOLIA.

A beautiful half-hardy perennial from Mexico, allied to the Penstemon. It forms regularly branching erect bushes 15 inches high, with narrow linear foliage. The flowers are tubular, bell shaped, of a light violet color, with a pale lilac throat. If sown early in Spring the plants will bloom in July-August, or, if sown in the Summer with other perennials and kept over Winter, will flower contin[illegible] Summer. Fine for pot as well [illegible] door culture. Electros free with orders for two [illegible]nces or more.

Trade price, per oz., $2.50.

This well-known variety needs no introduction. Stock of seed this year again very limited. Electros free with orders for five pounds or more.

Trade Price, per lb., $1.25.

EVERBEARING TOMATO

We all know the value of a Tomato that will begin to ripen its fruit early in the season, and will continue to do so until long after the main crop has gone. Such a crop will bring more money to the "square foot" than any other, and this is just what we have in the Everbearing Tomato. It is extraordinarily productive. The fruit, in the shape of a large plum, is of a deep scarlet red, and is produced in large and compact clusters, seldom less than fifty in a bunch. Toward the end of May the first fruit begins to ripen, and from then on until frost kill the plants, so that in mild localities, ripe Tomatoes are often found on the plants on Christmas day. While the fruit may be rather small, it is nevertheless, very firm, and of an exceedingly pleasant flavor. This variety should be grown extensively, and will, undoubtedly, prove very profitable. Electros free with orders for one hundred packets. It will be the best selling novelty this season.

Trade Price, per 100 packets, $3.00.

Asparagus Chicory.

THIS new vegetable, which has lately been introduced from France, will become universally popular when once fully known and rightly understood. Aside from its valuable qualities as an appetizing table vegetable, it possesses such important medicinal properties which should endear it to the hearts of everyone, especially to those having an **exhausted constitution or weak nerves.** The Asparagus Chicory is allied to the celeriac family, and can be grown with little trouble or care. It produces a large quantity of short stems, which, when cut, are produced again in a short time. The benefit derived from the use of these stems by persons troubled with stomach disease or weak digestion, is said to be remarkable. It has been recommended for this purpose by some of our best physicians, and is said by some to be a sure cure for dyspepsia. The leaves, when boiled, make a most delicious and wholesome salad. It can also be eaten raw the same as Celery, and is preferred, by many, to that delicious vegetable. When wanted to be used in this way, it can be blanched and made very tender by simply covering the stems with straw or leaves. Another way, practiced by many, is to tie the tops together in a bunch with a string when fully or partially grown. In this way the stems will become white and tender, and remain a long time in good eating condition. It can be kept all Winter in the cellar, the same as Celery. No garden is complete without this valuable and most excellent medicinal plant. Electros free with orders for two pounds or over.

Trade price, per pound, $1.50.

Vautier's New Golden Heart.

This is an improved strain of Golden Heart, growing much larger, and as a keeper has no equal. It has been raised and perfected by Mr. Charles H. Vautier, one of our best known market gardeners; his Celery always commands the highest price in market. Stock of seed limited. This is the first season we have had sufficient seed to offer to the trade. Mr. H. A. Dreer has catalogued it for a number of years, retailing the seed at $4.00 per pound. Electros free.

Trade price, per pound, $2.25.

Electros free with orders for two pounds or more. Two styles to select from. Owing to the unfavorable season, our stock is quite limited. Fully 50 per cent. of our seed blew out in cleaning, being so light.

Trade price, per pound, $3.00.

GOLDEN DRESDEN RADISH.

The tops are very scant and admit the closest planting. The flesh is crisp, white, juicy and of the finest flavor. Suitable either for growing in the open ground or forcing.

Trade price, per pound, $.50.

The New Imperial or Long Standing Kale.

A beautifully curled and crimpled sort, selected by a Philadelphia market gardener. Of strong, vigorous habit, perfectly hardy, bright green color and very attractive in appearance. It is superior to all other sorts, and will stand longer without shooting to seed than any other variety. Height about two feet.

This variety Messrs. Johnson & Stokes, and Mr. H. A. Dreer have listed for several years, the demand always exceeding the supply. Our seed has been carefully grown and will please the most critical market gardener. Electros free.

Trade price, per pound, 10 cents.
100 pounds, $35.00.
